

# GLASS BALUSTRADES

*Glass balustrades for internal and  
external applications*

## Glass Balustrades

Using our range of toughened and laminated options, Glassolutions safety glass delivers protection and a sleek, contemporary aesthetic for your balustrade.

Our team of technical specialists can assist you in choosing the right glass for your balustrade, whilst ensuring it meets all industry standards and regulations, giving you complete peace of mind.

Whether used in an internal or external application, we offer comprehensive safety glass for your balustrades. When selecting your glass, we recommend the following options:

- **PLANICLEAR®**: high-quality, clear glass.
- **DIAMANT®**: high-quality clear glass with a lower iron content, providing ultra-clear edges and maximum light transmission.

- **PARSOL® ULTRA GREY**: deeply tinted float glass with a rich grey hue that becomes more pronounced with thickness, featuring a high shine finish.
- **SATINOVO®**: Translucent glass with a matte finish, characterised by a uniformly smooth and satin-like appearance.

Once you've made your glass selection, it's crucial to ensure it complies with the relevant regulations for your specific application. Please enquire about our toughened, heat soaked, and laminated glass options to meet your requirements.
